AMG Software Module Advanced Rounding

Description

This module gives you an opportunity for more flexible rounding configuration of In/Out, Lunch and Break times. Besides it is a useful tool for evaluation of employee's attendance based on attendance codes. Depending on the amount of minutes an employee is late or early, employees receive some points, which can be either positive or negative, and which are later being summarized in a special report for evaluating employee's attendance.

Photos

Code	Name	Division	Group	Attendance	Value
16095001	Mtu				-1
16095002	Tue				-1
16095003	Wed				-1
16095004	Thu				-1
16095005	Fri				-1
16095006	Sat				-1
16095007	Sun				-1
