

Hand Punch 4000 Biometric Hand Scanner

Price: \$2117.50
Free shipping on US orders

Manufacturer: Schlage Biometric

Features

Features of the Schlage Hand Punch 4000 Biometric Time Clock

- ✓ Provides the most accurate time & attendance solution available
- ✓ Employee Messaging: 32 Characters per message per employee
- ✓ Employee Name: 16 Characters
- ✓ Employee Schedule: Schedules definable for each employee
- ✓ Includes 50 Foot RS232 Cable
- ✓ Eliminates buddy punching
- ✓ Fast and easy to use
- ✓ Standard with 530 active employees (Expandable)
- ✓ Platen also comes standard with a printed hand outline to ensure accurate hand placement while punching

Specifications of the Schalge Hand Punch 4000:

- ✓ Communication: Provided 50' Serial RS232 Cable
- ✓ Memory: 530 employees/users, expandable to 3,498
- ✓ Eliminates: Buddy Punching
- ✓ Dimensions: W8.85"xH11.65"xD8.55"
- ✓ Case: High-Strength, Injection-Molded Plastic
- ✓ Weight: 6lbs (2.7kg)
- ✓ Power: 12 to 24 VDC or 12 to 24 VAC 50-60 Hz, 7 watts
- ✓ Relative Humidity: 5% to 85% NC
- ✓ Verification Time: Less than one second
- ✓ Template Size: 9 bytes

Description

Hand Punch 4000 Biometric Time Clock

When You Want To Cut Time and Attendance Costs... Do It By Hand

Schlage Biometrics brings the accuracy and convenience of biometric technology easily within reach of any time and attendance application with the Hand Punch 4000 Biometric Time Clock. In operations that range from coal mines to clean rooms, the Schlage Hand Punch 4000 has proven itself to be a practical and precise solution for employee time management and access control.

Our Biometric Time Clock, Hand Scanner, Works by Identifying Employees' Hand Geometry Instantly

Schlage Hand Punch 4000 Biometric Time Clock identifies the employee by the unique size and shape of their hand. This means your employees will no longer need to carry cards or keys. The costs and risks associated with credentials that can be lost, stolen or duplicated without authorization is also eliminated. Schlage Hand Punch 4000 Biometric Time Clock also eliminates time fraud by making it virtually impossible to “buddy punch.” The result is more accuracy, productivity and profitability for your company.

Your Hand Is Your Card

With the Hand Punch 4000; there are no cards to create, administer, carry – or lose. For mid-size companies, the Hand Punch 4000 Biometric Time Clock provides a high return on investment by eliminating the cost associated with administering and managing cards. For companies that have small, multiple locations, minimal supervision leaves an opportunity for buddy punching and time fraud. With the Schlage Hand Punch 4000 biometric time clock one employee can't punch for the other. Time fraud is eliminated thereby reducing payroll costs and positively impacting your company's profitability.

Affordable Ethernet Solution

The HandPunch 4000 Biometric Time Clock comes standard with serial RS232 connection allowing for quick integration into your time management systems, applications and existing network infrastructure. Additionally you can upgrade to Ethernet (TCP/IP) as well.

Hand Geometry Technology

The Hand Punch 4000 uses Schlage's field-proven hand geometry biometric technology. The Schlage Hand Punch 4000 captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No finger or palm prints are utilized. The technology works well indoor as well as in harsh environments.

Programmable For Your Needs - Ten user-definable data management options let you collect and/or display data as employees punch in, such as department transfers, tips collected, job codes or pay codes. The Hand Punch 4000 biometric time clock may also be used to allow employees to review punches, job schedules, vacation time accumulated, hours worked and more.

Manage Schedules by Employee - Individual employee schedules may be downloaded to the Schlage Hand Punch 4000 Biometric Time Clock to restrict the times that an employee can punch, reducing unauthorized overtime.

Built-in Bar Code Reader - When a badge is required for identification, the Hand Punch 4000 biometric time clock is available with an integrated bar code reader. The swipe-style reader supports the most popular bar code formats and allows for infrared badges.

Antimicrobial Protection

The Schlage Hand Punch 4000 biometric time clock contains a silver-based anti-microbial agent-which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the Hand Punch 4000.

Hand Outline

The Hand Punch 4000 biometric time clocks comes standard with a blue hand outline printed on the platen. This hand outline helps new users place their hand accurately on the platen thus decreasing initial enrollment time and better enrollment quality. It also includes the Ingersoll Rand Schlage Biometrics logo.

When paired with the AMG Employee Attendance software, the HandPunch 4000 biometric attendance system delivers tangible benefits and reduces payroll and administration costs. To view our
